2.1 Customer Journey Map — Elena (Heritage Conservation Officer)

Stage	Awareness	Consideration	Onboarding	Usage	Decision / Outcome
Actions	Notices Danger List updates seem inconsistent across UNESCO committee reports	Hears about a shared Tableau dashboard covering site categories and danger status	Opens the Tableau Public dashboard for the first time via a shared link	Filters by Region and Category, explores the danger-status map and charts	Recommends conservation funding priorities based on data
Thoughts	‘Why does the Arab States region always seem over-represented on the Danger List?’	‘Could this dashboard help me build the funding case faster?’	‘This looks detailed — but I can filter by region and category’	‘Conflict-affected countries clearly dominate the Danger List’	‘I feel confident presenting this to the funding committee’
Emotions	Frustrated, uncertain	Curious, slightly skeptical	Overwhelmed, then reassured	Engaged, empowered	Confident, relieved
Touchpoints	UNESCO committee PDFs, internal meetings	Colleague recommendation	Tableau Public dashboard (shared link)	Interactive filters: Region, Category, Danger Status	Final conservation funding priority list
Opportunities	Raise awareness of the dashboard across conservation teams	Simplify the dashboard UI for first-time users	Add clear titles and guided story navigation	Ensure fast filter response across the map and charts	Track funding outcomes against flagged sites over time

Reading the Journey Map The emotional curve dips lowest at Onboarding, when Elena first opens an unfamiliar dashboard, then climbs as filters for Region, Category, and Danger Status let her narrow the view to something personally relevant. This confirms that usability and a clean first impression (NFR-01) are the difference between a conservation officer abandoning the tool and one who reaches a confident funding recommendation.
