2.2 Solution Requirements

Functional Requirements

FR #	Requirement	Description
FR-01	Data Connectivity	System shall connect to the Kaggle UNESCO World Heritage Sites dataset (~1,121 sites, 12 fields, 1978–2019)
FR-02	Category Filter	System shall allow users to filter all visualizations by Site Category (Cultural, Natural, Mixed)
FR-03	Region / Country Filter	System shall allow filtering by UNESCO Region and by Country
FR-04	Danger Status Filter	System shall allow filtering / highlighting by Danger List status (In Danger / Not In Danger)
FR-05	World Map of Sites	System shall display a map of all sites, colour-coded by danger status and sized or filtered by category
FR-06	Category Distribution Chart	System shall display a chart comparing the count of Cultural, Natural, and Mixed sites
FR-07	Region-wise Danger Ranking Chart	System shall display a ranked bar chart of regions/countries by number of sites in danger
FR-08	Inscription Trend Chart	System shall display a line chart of the number of sites inscribed per year from 1978 to 2019
FR-09	Role-Based Dashboards	System shall combine charts into 3 dashboards: Conservation Officer, Tourism Planner, and Policy Researcher views
FR-10	Tableau Story	System shall present a guided narrative Story with one story point per persona

FR #	Requirement	Description
FR-11	Tableau Public Publishing	System shall be published to Tableau Public for browser-based access without login
FR-12	Tooltip on Hover	All charts shall display Site Name, Country, Category, and Danger Status on hover

The twelve functional requirements above trace directly back to the Customer Journey Map: filtering requirements (FR-02 to FR-04) address the Onboarding/Usage friction points, while the dashboard and Story requirements (FR-09, FR-10) address the Decision stage where Elena, Marcus, and Amara each need a role-specific view rather than one generic report.

Non-Functional Requirements

NFR #	Category	Requirement
NFR-01	Usability	Dashboard UI shall be navigable by non-technical stakeholders without training
NFR-02	Performance	All filters shall respond and re-render within 3 seconds on the full site dataset
NFR-03	Accessibility	Published Tableau Public workbook shall be reachable via a public URL without login or plugin install
NFR-04	Scalability	Solution architecture shall support new inscription years being appended without redesigning dashboards
NFR-05	Compatibility	Solution shall render correctly on Chrome, Edge, and Safari, on desktop and Tableau Public mobile view
NFR-06	Maintainability	Workbook shall be saved as a packaged Tableau workbook (.twbx) for portability
