2.5 Technology Stack

Table 1 — Components & Technology

Component	Technology Used	Purpose
Data Source	Kaggle UNESCO World Heritage Sites Dataset (CSV)	Site-level heritage data: category, country, region, year inscribed, danger status, 1978–2019
Data Modeling	Tableau data connection & calculated fields	Danger Status flag, Years-Since-Inscription calculated field
Data Visualization	Tableau Desktop / Tableau Public	Building category, regional, and trend charts, 3 dashboards, and 1 Story
Geographic Mapping	Tableau built-in mapping	Country-wise site location and danger-status map
Dashboard Publishing	Tableau Public (free cloud hosting)	Browser-accessible dashboard sharing via public URL
Version Control	GitHub	Project repository for all deliverables and documentation
Documentation	Microsoft Word (.docx)	Project deliverables and final report
Project Management	Team task tracker	Epic/story tracking across the 5-person team

Table 2 — Application Characteristics

Characteristic	Description
Open Source / Free Tools	Tableau Public is free for public publishing; GitHub is free for public repositories

Characteristic	Description
Security	Only publicly available UNESCO heritage site data is displayed; no personal data involved
Scalability	New inscription years can be appended to the source and the workbook refreshed without redesign
Availability	Tableau Public guarantees high availability; no server maintenance required
Performance	~1,121 site rows render within 3 seconds across all filters on a standard laptop
Compatibility	Works on Chrome, Edge, Safari; responsive on desktop and Tableau Public mobile view
