Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites (2019)

Project Title	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites (2019)
Domain	Culture & Heritage Analytics / Tourism & Conservation Business Intelligence
Tool	Tableau Desktop / Tableau Public
Dataset	Kaggle UNESCO World Heritage Sites Dataset, 1978–2019 (~1,121 sites, 12 fields)
Prepared By	M. Deepika (Team Lead), M. Supraja, K. Srikala, I. Pushpa, U. Bhavana
Mentor	Not yet assigned

3.3 Solution Architecture

The end-to-end architecture for this project follows a linear BI pipeline from raw data to published dashboard:

- Layer 1 — Data Source: Kaggle UNESCO World Heritage Sites dataset (~1,121 sites, 12 fields, 1978–2019)
- Layer 2 — Data Preparation: Fields reviewed for consistency; Country and Region names standardised across the dataset
- Layer 3 — Tableau Data Connection: Site-level extract connected as the primary source; Country field assigned Geographic Role for map rendering
- Layer 4 — Visualization Layer: Individual worksheet charts — (1) World map by Danger Status, (2) Category distribution chart, (3) Region-wise Danger ranking chart, (4) Inscription trend line chart
- Layer 5 — Dashboard Layer: 3 role-specific Tableau dashboards — Conservation Officer Dashboard, Tourism Planner Dashboard, Policy Researcher Dashboard
- Layer 6 — Story Layer: Tableau Story with one story point per persona, each embedding a dashboard with a narrative caption
- Layer 7 — Publishing & Delivery: Workbook saved to Tableau Public; shareable URL generated and submitted to the GitHub repository
